

Local radio is merely someplace else for people to attempt to sell me crap I neither want nor need. I gladly pay XM ten bucks a month to avoid obnoxious radio ads and other annoyances so a part of traditional radio programing. It would be a wonderful thing if I could get important local information such as weather and traffic on my XM. Curently, getting this information is for too difficult as I wade through smug "on-air personalities" and ads for the latest sale at the mega car dealerships in a futile attempt to access this information. PLEASE reject the NAB's petition 04-160.
